

PROBLAD VERDE

BLAD biofungicides are produced on a liquid formulation, containing 250 g of BLAD active ingredient per liter.

PRODUCT FEATURES

- Category: Biofungicide
- BLAD is a naturally-occurring seed storage protein in sweet lupines
- Characterized as a fragment of the amino acid sequence of β -conglutin
- 1 gallon of ProBlad Verde contains 2.1 lbs of BLAD protein

BENEFITS OF BLAD

- Controls powdery mildew, botrytis, monilinia and other diseases in certain crops
- Stops disease in 4-8 hours
- Problad is a multiple-site mode of action-an effective fungicide and prevents fungi from developing resistance
- Controls all disease life stages
- Non-toxic for insects (pollinators), mammals and plants

TECHNICAL SPECS	
Certifications	OMRI
Guaranteed Analysis	Banda de Lupinus albus doce (BLAD)* 20% Other Ingredients: 80%
pH	5.0 – 7.5
EC	4.77
Form	Liquid
Appearance	Brown liquid
Stability	Stable
Available Variants	2.5 gal

FOR BEST RESULTS

- Read product label and follow all instructions
- Applied as a foliar spray stand-alone or in tank mixes with other registered pesticides with spray equipment commonly used
- Use as a tank-mix or rotational partner in a disease management program

SUGGESTED APPLICATION RATES

(*Oz/ACRE *Read entire label and follow instructions. *These rates are a summary.)

CROP	MIN	MID	MAX	GALS H2O	CROP	MIN	MID	MAX	GALS H2O
Nut Trees	18	32	45	50-100	Blueberries	18	32	45	50-100
