

WOLLASTONITE

BlueGold® Injectable Calcium Silicate (Wollastonite)

PRODUCT FEATURES

- Calcium Silicates have emerged as the most essential and available source of Silicates for soil applications
- Eden Calcium Silicate is a raw mineral with a relatively high pH & low water solubility, which is why it is micronized to less than 40 microns for injection capabilities
- This product is considered a 'lime'

BENEFITS OF WOLLASTONITE

- Wollastonite is a Calcium and Silicate source for a true defense against heavy metal toxicities in the soil.
- Silica can benefit plant growth and benefit plants under toxicity or abiotic stress
- Silica may also enhance soil fertility, improve disease and pest resistance, and increase tolerance to excesses of Iron or Manganese

FOR BEST RESULTS

- Apply similar to lime at a rate as indicated by soil analysis
- For irrigation injection, filter to 100 mesh and apply via sprinkler
- For Foliar applications, use low rates and tank mix with surfactant
- For weekly soil or water buffering, agitate and apply with irrigation water

TECHNICAL SPECS	
Certifications	OMRI
Guaranteed Analysis	Wollastonite <99%
pH	10.0 +/- 15%
Form	Solid
Appearance	White Powder
Weight	17 lbs
Available Variants	50 lbs

SUGGESTED APPLICATION RATES

Label Rates	MIN	MID	MAX
<i>Foliar for Acre +</i>	.5 lb/ac	1 lb/ac	2 lb/ac
<i>Soil for Acre +</i>	1 lb/ac	2 lb/ac	5 lb/ac
